

In-house Waste Management

Minimised disposal costs and maximised recycling revenues.

Our in-house waste management pays double! Where today you are still paying a lot of money to purchase part of your resources, and in the end to dispose of them unused as waste, we ensure already tomorrow for reduced waste costs and higher reclaimed materials proceeds. We achieve this in that we make your waste quantities and costs transparent, and rigorously optimising your waste streams with respect to efficiency and recycling yields – which benefits not only you, but also the environment.

Our Services

1. We create transparency in your waste costs and quantities.
2. We optimise your waste flows.
3. We establish a professional waste management concept.
4. We train your employees.
5. We maintain meaningful statistics.
6. We prepare the legally required reports.
7. We support your hazardous materials and waste management officers.

Your Benefits

- ✓ Reduced waste disposal costs
- ✓ More revenue from reclaimed materials

✓ Optimisation of container utilisation and transport logistics

✓ Waste prevention

Benefits for the environment

✓ Preservation of natural resources

✓ Reduction of CO₂ emissions

✓ Waste prevention
