

Reporting

We prepare meaningful reports for you.

The perfect basis for your business decisions: both our standard and our customer-specific reports offer you a superior overview of all the quantities and costs related to your packaging management. First, we establish a country report of your packaging volumes and costs itemised by material fractions. After that, we will incorporate this data into a consolidated report for the countries you select. Meaningful, transparent and easily comparable data will enable you to identify savings potentials and possibilities for optimisation at a glance.

Our Services

1. We establish a country report on volumes and costs itemised by fractions.
2. We transfer the country reports into a consolidated report.

Your Benefits

- ✓ 100% data transparency
- ✓ Identification of savings potentials
- ✓ Easy comparisons
