

Handling and Collection of WEEE

Safe and environmentally compatible disposal of your e-waste

Our full-service package: we support you in the legally compliant fulfilment of the complex regulations for waste electrical and electronic equipment (WEEE). Knowledgeable consulting on all legal obligations and new developments pursuant to the WEEE Directive is just the first step. We also determine your WEEE product master data and categorise your products in accordance with the various requirements in different countries. And we can even take over registration and quantity reporting for you. You are thus always on the safe side, and free to focus fully on your core business.

Our Services

1. We support you in complying with the country-specific regulations.
2. We provide consulting with regard to your legal obligations.
3. We determine your WEEE product master data.
4. We categorise your e-products in line with country-specific requirements.
5. We take care of your registration and quantity reporting.
