

Reporting Tool

Quantity reporting made easy – with R2R “Ready to Report”

The time-saving and reliable solution for your quantity reporting – with our R2R-Ready to Report software, you can take care of your reporting obligations easily, quickly and securely. It allows you to report to all authorised systems in Germany as well as to selected international systems. You prepare and submit your reports from your own computer – without having to worry about your sensitive data falling into the wrong hands. We stand at your side with comprehensive service from a single source – from professional and technical consulting, to customer-specific setup and data migration, up to software maintenance.
